

There were seven members present at the field for the monthly meeting.

Norris stated that a steering issue with the club mower has been repaired, and it is now in first class operating condition. Repair costs were minimal, and the plan is to perform full preventative maintenance on the tractor at the end of the season, most likely in late October or early November. This will be dependent on how long the weather cooperates with extending or shortening the flying season.

The second FUN FLY is scheduled for Saturday, September 30th, and will follow the same format as June. Club will provide food and beverages, and weather will hopefully cooperate. Rain date will be the next day, Sunday, October 1st. To prepare for event, our next meeting will be held on Wednesday, September 20th. All members are encouraged to attend the meeting and the FUN FLY.

It was also decided to try and hold an event on January 1st, 2018, the so-called FREEZE FLY, which a number of clubs do on an annual basis. More discussion on this topic at future club meetings.

There being no further items to be discussed, the meeting adjourned at 7:40 PM.

Mike Kraynyak,

Secretary
