A brief meeting was held at 7:00 PM at the club field in Bally, PA, and was attended by seven of the club members.

OLD BUSINESS

The club tractor battery was replaced, and has mower is great. The field is in very good shape, and mowing has been done on a weekly basis since the field was rolled in mid-May. The benches at the flight stations have been stained, the next project to be undertaken will be the repair of the pin board. We do need two sets of wheels for a couple of the flight stations, and replacements are readily available at either Lowe's or lawn equipment repair shops.

As of the meeting there was nothing new from the FAA on drones or UAVs. Maybe by the next meeting the FAA will come to some resolution with congress over proposed regs.

NEW BUSINESS

The FUN FLY held on June 25th was blessed with good weather and attendance, great food, and some great flying by a number of the members. I am pleased to report that no one went home with a "new" kit to work on, despite some fancy flying by both our fixed wing and heli members.

A special thank you and well done to both Norris Matthews and Bill Sherman for the tent, food, beverages, and culinary skill. It was a great day for the club, and both of these gentlemen do an awful lot of work behind the scenes which benefits the rest of the membership.

The next club meeting will be held on July 20th at the field at 7:00 PM. Please mark your calendars so that we can begin to plan for our next FUN FLY in September,

Clear skies, gently winds and soft landing to all,

Mike Kraynyak

Secretary
